

Our Leak Detection Monitor was developed to offer the most economical environmental monitoring solution on the market.

This system allows leak detection in fuel pumps, oil filters and tank interstices.

BENEFITS

ECONOMIC

Environmental Monitoring System with the best cost-benefit

INTUITIVE

Easy to use with pictographic and intuitive information

SIMPLE INSTALLATION

Plug and play installation

MEETS STANDARDS

Prevents contamination risks

APPLICATIONS

PUMPS SUMP

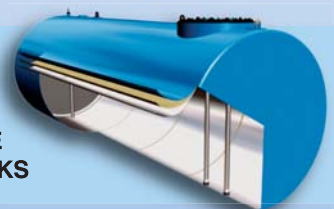

Monitor leaks in pump sumps

FILTERS SUMP

Monitor leaks in filters sumps

DOUBLE WALL TANKS

Monitor leaks in fuel tanks

PRODUCT CHARACTERISTICS

- ▶ Visual and audible alarm;
- ▶ Power: 220v or 110v;
- ▶ Internal energy stabilization circuit;
- ▶ Stores and records event history (the last 30 events);
- ▶ Simple and economical installation;
- ▶ Connects up to 8 sensors - accepts more than one sensor per channel connected in series;
- ▶ Auxiliary output for alarm and connection with other devices;
- ▶ Event signaling screen with date and time of occurrence;
- ▶ Simplified and suitable operation for equipment of sporadic use;
- ▶ Single button for accessing system information;
- ▶ Printed instruction on the monitor panel;
- ▶ Eliminates the use of shielded cables for installation.

ELS SYSTEM

■ Online Inventory Management ■ Easy Operation and Management ■ E-mail Alerts and Measurements ■ Meets the Standards

Get to know the ELS SYSTEM, the most complete tank measurement and environmental monitoring on the market
